Appendix 1/ Приложение 1

Historical reference/ Историческая справка

Now let's listen to some new facts about the most interesting places of London as the capital of Great Britain.

Westminster Abbey is a symbol of English tradition at its best. The coronations of nearly all English kings and queens since William the Conqueror have taken place here. Many of them are buried within the Abbey.

Beneath the roof of this Gothic building there are also the graves and memorial slabs of statesmen, philosophers, men of letters and other distinguished people.

Here you can see memorials to Issaac Newton, Charles Darwin, Geoffrey Chaucer, Alfred Tennyson, Charles Dickens and Thomas Hardy.

I want to tell you about Tower Bridge.

Tower Bridge was opened in 1894. it takes its name from the Tower of London.

The hydraulic mechanism can raise and lower the bridge in about one and a half minutes. The covered walkway between the two towers is opened to the public and offers a spectacular view of London.

The city's greatest monument, St. Paul's Cathedral was built by Sir Christopher Wren between 1675 and 1710 to replace the old Cathedral that was largely destroyed in Great Fire of 1666.

Christopher Wren is buried there. Among the many memorials to famous men within the Cathedral are the tombs of Wellington, victor of Waterloo, and Nelson, hero of Trafalgar.
